Powder in sachets - 30 x 25 g sachets

PheLNAA® 3+ powder in sachets is a phenylalanine-free amino acid mixture with vitamins, minerals, and other nutrients, indicated for the dietary management of individuals with hyperphenylalaninemia and/or phenylketonuria starting from 3 years of age.

Thanks to its composition, PheLNAA® 3+ powder in sachets can provide a complementary nutritional source to supplement the diet established by the Specialist Centre, both in children from 3 years of age and in adults.

Of particular importance in the formulation of PheLNAA® 3+ is the presence of microalgal DHA (docosahexaenoic acid), Lutein, Calcium and Vitamin D₃.

PheLNAA® 3+ conveniently packaged in sachets, has a pleasant citrus flavour.

INSTRUCTIONS FOR USE

The daily dose of the product should be determined by the doctor according to age, body weight and individual tolerance level to phenylalanine.

The product should be taken before or during meals, by dissolving the content of one sachet in about 100 ml of water or another suitable liquid and stirring until completely dispersed. If, after intake, any residues of undissolved powder remain in the glass after consumption, dilute them with further water and drink immediately. The product, once reconstituted, must be taken immediately.

IMPORTANT WARNINGS

The product must be used under medical prescription and supervision.

It is not suitable for use as a sole source of nutrition, and must not be administered parenterally. It is intended for individuals starting from 3 years of age or over. The product may pose a health risk if consumed by individuals with no specific medical condition for which the product is indicated.

Keep out of the reach of children. Do not swallow or administer in case of allergy or intolerance to one or more ingredients.

STORAGE CONDITIONS

Store in a cool and dry place at a temperature not exceeding 25°C, away from light, moisture, and direct heat sources.

The expiry date refers to the product in unopened packaging and correctly stored.

Do not dispose of in the environment after use.
