

Oracol[®] oral spray

15 ml bottle
with oral dispenser

INDICATIONS

Adjuvant for the protection of oral mucosa and gums in case of irritation. Helps in providing relief from pain caused by stomatitis, gingivitis, mouth ulcers, trauma. Thanks to the thickening and filming properties of PVP, it creates a protective layer which, adhering to the mucosa, isolates it from the external environment. The presence of folic acid keeps the mucosa in pH and humidity conditions ideal to favour the normal healing process.

INSTRUCTIONS FOR USE

Spray the product 2 or 3 times on the oral mucosa. Place the cap on the nozzle after each use. Repeat the application at least twice a day as needed, better in the morning and in the evening, after meals, having previously carried out appropriate oral hygiene. After each use it is recommended not to eat or drink, to prevent an early removal of the product.

WARNINGS

Keep out of the reach of children. Avoid contact with eyes. Do not ingest.
In case of hypersensitivity to any of the components consult your doctor before using the product.
The use of the bottle is strictly personal.

STORAGE

Store at room temperature away from heat sources and humidity.
The expiry date refers to the unopened product correctly stored.
